

PetStabilityRx

Salesforce Administrator Portfolio Project

Sabrina Justice

Salesforce Administrator (Career Transition)

Frederick, MD | <https://www.linkedin.com/in/sjustice92> | sabrinaj01192@gmail.com

Fictional veterinary chronic-care company supporting both pet owners (B2C) and veterinary clinics (B2B). Built in Salesforce Developer Edition.

Project Overview

Industry: Veterinary / Animal Health

Business Model: B2C + B2B

Focus: Chronic care subscriptions & clinic partnerships

Goal:

Design a Salesforce org that supports sales, subscriptions, automation, and reporting while following Salesforce admin best practices.

What I Built

Data Model:

- Accounts (Pet Owners & Veterinary Clinics)
- Opportunities with Products & Price Books
- Custom Objects: Pets, Subscriptions

Designed to clearly separate B2C pet owners and B2B clinic relationships while supporting scalable growth

Automation:

- Screen flow to create pet and subscription
- Validation rules to enforce data quality

Automation focused on reducing manual entry while preserving admin visibility and control.

Reporting:

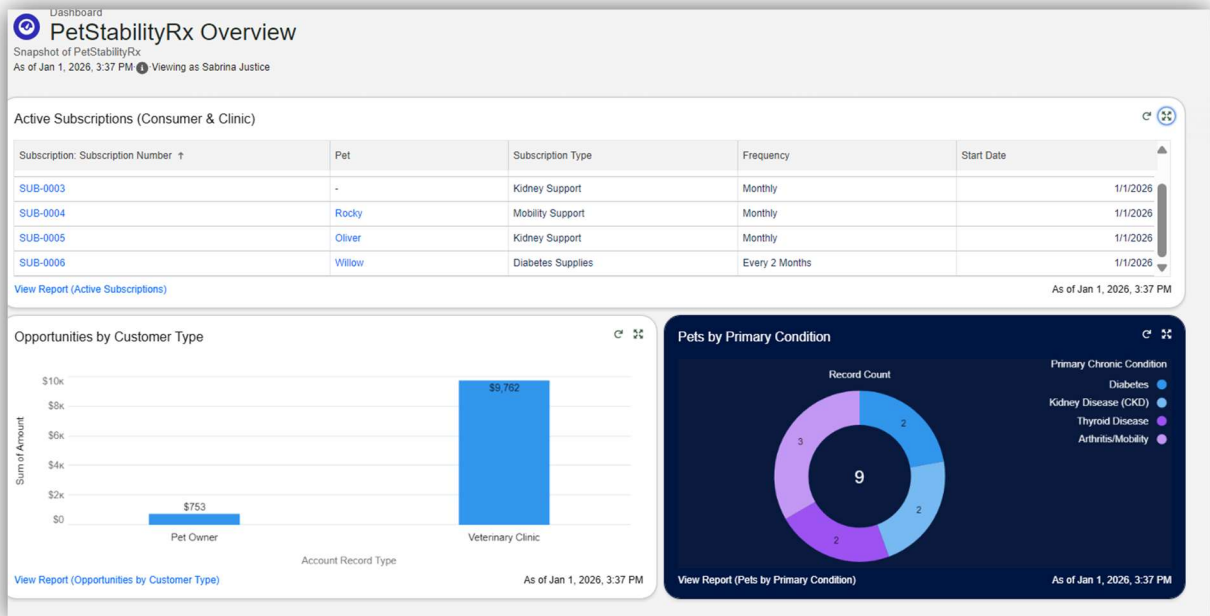

- Subscription revenue tracking
- Sales by customer type (B2C vs B2B)
- Pet population by primary condition

Reports provide visibility into revenue trends, customer mix, and pet care needs.

Screenshots

The screenshots below highlight key records, automation, and reporting used to support both B2C and B2B workflows.

Skills Demonstrated

- Salesforce Administration
- Lightning Experience
- Data Modeling
- Record Types & Page Layouts
- Declarative Automation
- Reports & Dashboards
- Validation Rules
- CRM Best Practices

Design Approach

This project was intentionally designed to balance functionality and maintainability. Automation was added only where it reduced manual effort without over-engineering, and data models were kept simple and scalable to reflect real-world Salesforce usage.
